Powerful Fundraising Intel Without Leaving Tessitura

Use the iWave Score to Identify Major Gift Prospects

The iWave Score is used to identify top major gift prospects, to prioritize a list of prospects, or to segment your donors. This score is generated by matching your constituent or household to public and proprietary records within the iWave database.

Batch Score Multiple Prospects

You can work quickly and efficiently with iWave for Tessitura by batch scoring your constituents with one click. This powerful batch scoring capability enables you to segment or prioritize a list of new prospects or current donors, directly within Tessitura. These scores let you build reports or prospect lists based on criteria specific to your organization.

Understand a Prospect's Capacity and Inclination to Give

The iWave Score provides a 360° view of prospective donors. Not only does it rate a prospect's capacity to give, it also rates their propensity to give, and affinity to *your* cause. And because your prospecting goals are unique, you can customize the weighting of each component.

Analyze a Donor's Giving to You and Others

Within Tessitura, iWave delivers a summary of a prospect's past giving history. This includes analysis of their giving to any nonprofit, such as total donations, value of donations, and planned giving potential. And if applicable, it will also generate a recency-frequency-monetary (RFM) score which analyzes a donor's giving specifically to your organization. Charitable giving information is provided by **VeriGift**, iWave's own charitable donations database, which contains more than 150 million verifiable charitable donations.

Actionable Screening Results

Segment your donor database into four groups based on their internal (RFM score) and external (iWave Score) wealth and philanthropic history using iWave's **Insights** analytics tool.

With iWave, you can have confidence that you're asking the **right person**, for the **right amount**, at the **right time**.
